

Jae-Sung KWON is a professor and department chair at Department of Dental Biomaterials and Bioengineering, Yonsei University College of Dentistry. He is a medical doctor, acquired full registration with General Medical Council of United Kingdom following graduation of medical college in University of Nottingham, U.K., and received PhD from Yonsei University College of Dentistry, Korea. His current research topics are development of biomaterials and test methods related to medical devices, especially using alternative test model to animal experiments. He is a Director of Dental Device Testing and Evaluation Center in Yonsei University College of Dentistry, which is official testing lab approved by Ministry of Food and Drug Safety in Korea. He has been participating development of International Standards such as ISO for in vitro methods of testing medical devices using organotypic model and also currently serving as Convenor or several Working Groups in ISO/TC 106 (Dentistry) and Project Leader for several projects in ISO/TC 106 (Dentistry) and ISO/TC 194 (Biological and Clinical Evaluation of Medical Devices). During his research career, he published over 150 original publications. He got several scientific awards such as Yeonsong Award from Korean Academy of Dental Science, and Best Researcher Award from Yonsei University. He is a member of Korean Society of Alternatives to Animal Experiments (KSAAE) and served as Secretary of General Affair and Secretary of International Cooperations.
