

Yuan PANG is current an Associate Professor in the Department of Mechanical Engineering, Tsinghua University. Dr. Pang received Ph.D. degree in Bio-engineering from the University of Tokyo in 2013 and did her postdoc fellowship at the Institute of Industry and Science, University of Tokyo in 2013-2015. She started her work as an Assistant Professor at Bio-manufacturing center in Tsinghua University since 2016. Her research interests focus on developing new methods, technologies and explore new applications in the field of biomanufacturing and 3D bioprinting. She aims at *in vitro* construction of functional micro-organ/tissues, and further use them towards tissue repair, drug delivery and screening, pathology and inflammation study. She has published more than 30 high-impact SCI papers as the first and corresponding authors including *Nature Review Immunology*, *Gut*, *International Journal of Extreme Manufacturing*, *Chemical Engineering Journal*, *Advanced Healthcare Materials* in the last 5 years. During her research carrier, she got several scientific awards such as 2022 Science and Technology Nova of Beijing, 2020 Young Researcher Award by Lush Prize, Young Scientific Award of International Society of Biomaterials, publication awards of Tissue Engineering and Regenerative Medicine International Society- Asia Pacific. She now serves as the committee member of Chinese Society of Toxicity Testing and Alternatives, and the committee member of Micro/Nano Manufacturing Branch of the Chinese Society of Mechanical Engineering. She is also the Executive Editorial Board member in *Biomedical Materials*, Associate/Academic Editors of *Bio-Design and Manufacturing*, Youth Editor member in *International Journal of Extreme Manufacturing*.
